Clinical Haematology (Paediatrics & Child Health) at-a-glance

NEW CURRICULA

About the specialty

Clinical Haematology (Paediatrics & Child Health) focuses on the diagnosis and treatment of blood disorders in neonates, children and adolescents. Paediatric haematologists provide personalised, family-centred care across a range of healthcare settings.

Blood disorders
Diagnosing and managing inherited and acquired blood disorders.and bone marrow failure syndromes.

Laboratory & procedures
Interpreting investigations, managing transfusions and performing bone marrow biopsies.

Family-centred care
Providing personalised care for children and families across hospital and community settings.

ENTRY REQUIREMENTS

Completion of RACP Basic Training, including the Written and Clinical Examinations, general medical registration, and an Advanced Training position in an RACP-accredited training setting or network, or an approved non-core training position.

KEY RESOURCES

- **What you'll need to learn:** Curriculum standards
- **How you'll learn and demonstrate achievement of the standards:** Learning, teaching and assessment program (LTA)
- **Where you can train:** Accredited settings
- **What resources are available:** RACP Online Learning resources
- **Haematology specific resources:** Specialty-specific resources
- **Access to the TMP:** Training Management Platform

Your training experience

36 **months** minimum full time

3 **phases** of training

23 **learning** goals

LEARNING GOALS

BE	1. Professional behaviours
DO	2. Team leadership 3. Supervision and teaching 4. Quality and clinical research 5. Clinical assessment and management 6. Management of transitions in care 7. Acute care 8. Longitudinal care 9. Communication with patients 10. Prescribing 11. Procedures 12. Investigations 13. Clinic management 14. End-of-life care
KNOW	15. Anaemia and iron disorders 16. Haemoglobin disorders 17. Bleeding 18. Thrombosis 19. Malignancy, cytopenia, and bone marrow failure 20. Transfusion medicine 21. Neonatal haematology 22. Myeloproliferative disorders 23. Laboratory haematology in clinical practice

For full details, view the curriculum standards and LTA programs

Assessment & outcomes

PER PHASE – what you need to compete

1 PER ROTATION	**Rotation plan** Set learning goals with your supervisor
12 PER PHASE	**Learning captures** Reflect on a learning encounter
12 PER PHASE	**Observation captures** Be observed performing a work-based activity
4 PER PHASE	**Progress reports** Self-rate & be assessed against all learning goals

OVER THE COURSE OF TRAINING

- ✓ Learning courses
- ✓ 1 research project
- ✓ Developmental & psychosocial training

PROGRESSION

At the end of each phase, the Progress Review Panel makes a decision based on evidence of competence, completion of requirements, and your Rotation Supervisor's recommendation.

QUALIFICATION

Fellow of the Royal Australasian College of Physicians (FRACP)
Advanced Training — Clinical Haematology
(Paediatrics & Child Health)
