

NEW CURRICULA

Learning, teaching, and assessment programs

Advanced Training in Gastroenterology (Adult Medicine and Paediatrics & Child Health)

About this document

The new Advanced Training in Gastroenterology curriculum consists of curriculum standards and learning, teaching, and assessment (LTA) programs.

This document outlines the Advanced Training in Gastroenterology LTA programs for trainees and supervisors. It should be used in conjunction with the Advanced Training in Gastroenterology [curriculum standards](#).

LTA STRUCTURE

The learning, teaching, and assessment (LTA) structure defines the framework for delivery and trainee achievement of the curriculum standards in the program.

The program is structured in three phases. These phases establish clear checkpoints for trainee progression and completion.

Entry criteria

Prospective trainees must have:

- completed RACP Basic Training, including the Written and Clinical Examinations
- general medical registration with the Medical Board of Australia if applying in Australia, or a medical registration with a general scope of practice with the Medical Council of New Zealand and a practising certificate if applying in Aotearoa New Zealand.
- an Advanced Training position in an RACP-accredited training setting or network or an approved non-core training position.

LTA PROGRAMS

The LTA programs outline the strategies and methods to learn, teach, and assess the curriculum standards.

About the program

Purpose of Advanced Training

The RACP offers Advanced Training in 33 diverse medical specialties as part of Division, Chapter, or Faculty training programs.

The purpose of Advanced Training is to develop a workforce of physicians who:

- have received breadth and depth of focused specialist training, and experience with a wide variety of health problems and contexts
- are prepared for and committed to independent expert practice, lifelong learning, and continuous improvement
- provide safe, quality health care that meets the needs of the communities of Australia and Aotearoa New Zealand.

Overview of specialty

Gastroenterologists have expertise in the prevention, investigation, diagnosis, and management of diseases and disorders that affect the digestive system.

Gastroenterologists have strong clinical reasoning and decision-making skills, and work with a variety of patients with acute and chronic conditions to:

- **diagnose, treat, and manage gastrointestinal and hepatobiliary disorders.** Some of the common conditions include inflammatory bowel disease (IBD), liver disease (e.g. hepatitis or metabolic disease), pancreatic and biliary disease, disorders affecting function and motility, digestive health issues, gastrointestinal cancer, congenital or genetic conditions of the gastrointestinal tract, and gastrointestinal manifestations of psychiatric disorders.
- **provide acute care for gastrointestinal emergencies.** Certain gastrointestinal disorders can be life threatening and require emergency treatment. Gastroenterologists need to make robust decisions under pressure to ensure optimal patient outcomes.
- **perform diagnostic and therapeutic procedures.** Gastroenterologists apply the latest evidence-based technologies to assess, diagnose, treat, and manage gastrointestinal conditions. General gastroenterologists may perform a range of non-surgical investigations and procedures.
- **work with patients to improve nutrition.** Gastroenterology focuses on the health of the digestive system or the gastrointestinal tract. The gastrointestinal system is responsible for the digestion of food, absorption of nutrients, and removal of waste from the body. Achieving and maintaining good nutrition is a key component of managing the troubling symptoms of gastrointestinal and liver (especially fatty liver) conditions.

Gastroenterologists are compassionate and non-judgemental. They demonstrate this with all patients, including those with eating disorders, conditions secondary to substance abuse, and patients who may be embarrassed to seek help. To deliver safe patient care, gastroenterologists have a focus on leadership, education, and research, including:

- **leading and/or working as an integral member of multidisciplinary teams.** Gastroenterologists collaborate with other health professionals to make balanced and objective clinical decisions, and ensure each patient receives the best available treatment and management.
- **educating patients and communities, and advocating for disease prevention.** Gastroenterologists play a key role in educating patients and communities, and in advocating for public health and disease prevention (e.g. hepatitis B vaccinations and awareness of fatty liver disease).
- **managing resources for the benefit of patients and communities.** Gastroenterologists apply a biopsychosocial approach to ensure the delivery of efficient, cost-effective, and safe care for the benefit of their patients and communities.
- **applying a scholarly approach.** Gastroenterologists conduct academic research to discover better ways of understanding, diagnosing, treating, and preventing disease. They apply research to improve the treatment and management of patients.
- **demonstrating a commitment to teaching and learning.** Gastroenterologists are committed to maintaining lifelong excellence in practice through continuous professional development and fostering the learning of other health professionals through mentoring, supervision, and teaching.

Supervising committee

The program is supervised by the Training Program Committee in Gastroenterology and the Aotearoa New Zealand Training Program Subcommittee in Gastroenterology.

Qualification

Trainees who successfully meet the completion standards and criteria of this program will be awarded Fellowship of the Royal Australasian College of Physicians (FRACP).

Learning goals and progression criteria

Learning, teaching, and assessment structure

The learning, teaching and assessment structure defines the framework for delivery and trainee achievement of the curriculum standards in the Advanced Training program.

Advanced Training is structured in three phases. These phases will establish clear checkpoints for trainee progression and completion.

- 1 **Specialty foundation**
 - Orient trainees and confirm their readiness to progress in the Advanced Training program.
- 2 **Specialty consolidation**
 - Continue trainees' professional development in the specialty and support progress towards the learning goals.
- 3 **Transition to Fellowship**
 - Confirm trainees' achievement of the curriculum standards, completion of Advanced Training, and admission to Fellowship.
 - Support trainees' transition to unsupervised practice.

Figure: Advanced Training learning, teaching, and assessment structure

- An **entry decision** is made before entry into the program.
- **Progress decisions**, based on competence, are made at the end of the specialty foundation and specialty consolidation phases of training.
- A **completion decision**, based on competence, is made at the end of the training program, resulting in eligibility for admission to Fellowship.

Advanced Training is a **hybrid time- and competency-based training program**. There is a minimum time requirement of full-time equivalent experience, and progression and completion decisions are based on evidence of trainees' competence.

Entry criteria

| | |
|-------------------------|--|
| Entry attributes | <p>Prospective trainees can demonstrate:</p> <ul style="list-style-type: none">• a commitment and capability to pursue a career as a gastroenterologist.• the ability and willingness to achieve the common learning goals for Advanced Training:<ul style="list-style-type: none">• team leadership• supervision and teaching• the professional behaviours, as outlined in the Competencies |
| Entry criteria | <p>Prospective trainees must have:</p> <ul style="list-style-type: none">• completed RACP Basic Training, including the Written and Clinical Examinations• general medical registration with the Medical Board of Australia if applying in Australia, or a medical registration with a general scope of practice with the Medical Council of New Zealand and a practising certificate if applying in Aotearoa New Zealand.• an Advanced Training position in an RACP-accredited training setting or network or an approved non-core training position. |

Progression criteria

To progress to the next phase or to complete the program, trainees must demonstrate:

- the ability to plan and manage their learning and to complete their learning and assessment requirements in a timely manner
- achievement of the learning goals to the levels outlined in the [learning goal progression criteria](#).

Training committees or delegated progress review panels will consider evidence supporting trainees' achievement of the progression criteria and make progress decisions.

If criteria have not been met, committees or panels may decide to place conditions on trainees' progression to the next phase of training or not to progress trainees until all criteria have been achieved.

Learning goals

The [curriculum standards](#) are summarised as **21** learning goals.

The learning goals articulate what trainees need to be, do, and know, and are assessed throughout training on a five-point scale. This scale determines the expected standard for each learning goal at the end of each training phase. Trainees must meet these standards to progress to the next phase or complete the program.

Learning and assessment requirements are linked to the learning goals which allows trainees to demonstrate competence across each learning goal.

Rating scales

| Levels | 1 | 2 | 3 | 4 | 5 |
|---|--|--|--|---|---|
| Be: Competencies (professional behaviours) | Needs to work on behaviour in more than five domains of professional practice | Needs to work on behaviour in four or five domains of professional practice | Needs to work on behaviour in two or three domains of professional practice | Needs to work on behaviour in one domain of professional practice | Consistently behaves in line with all ten domains of professional practice |
| Do: Entrustable Professional Activities (EPAs) | Is able to be present and observe | Is able to act with direct supervision | Is able to act with indirect supervision (i.e., ready access to a supervisor) | Is able to act with supervision at a distance (i.e., limited access to a supervisor) | Is able to supervise others |
| Know: Knowledge guides | Has heard of some of the topics in this knowledge guide | Knows the topics and concepts in this knowledge guide | Knows how to apply this knowledge to practice | Frequently shows they apply this knowledge to practice | Consistently demonstrates application of this knowledge to practice |

| | | Progression criteria | | Completion criteria |
|------|---|---|---|---|
| | Learning goals | Specialty foundation <i>By the end of this phase, trainees will:</i> | Specialty consolidation <i>By the end of this phase, trainees will:</i> | Transition to fellowship <i>By the end of training, trainees will:</i> |
| Be | 1. Professional behaviours | Level 5 consistently behave in line with all ten domains of professional practice | Level 5 consistently behave in line with all ten domains of professional practice | Level 5 consistently behave in line with all ten domains of professional practice |
| | 2. Team leadership: Lead a team of health professionals | Level 3 able to act with indirect supervision | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 3. Supervision and teaching: Supervise and teach professional colleagues | Level 3 able to act with indirect supervision | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 4. Quality improvement: Identify and address failures in healthcare delivery | Level 2 able to act with direct supervision | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 5. Clinical assessment and management, including prescribing: Clinically assess and manage the ongoing care of patients, including prescribing therapies tailored to patients' needs and conditions | Level 3 able to act with indirect supervision | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 6. Acute care: Manage the early care of acutely unwell patients | Level 4 able to act with supervision at a distance | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 7. Longitudinal care, including transitions and end-of-life: Manage and coordinate the longitudinal care of patients with chronic illness, disability and/or long-term health issues, including transitions and end-of-life care | Level 3 able to act with indirect supervision | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 8. Communication with patients: Discuss diagnoses and management plans with patients | Level 4 able to act with supervision at a distance | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| | 9. Procedures: Plan, prepare for, perform, and provide aftercare for important practical procedures and investigations | Level 2 able to act with direct supervision | Level 3 able to act with indirect supervision | Level 5 be able to supervise others |
| | 10. Investigations: Select, organise, and interpret investigations | Level 4 able to act with supervision at a distance | Level 5 able to provide supervision | Level 5 be able to supervise others |
| | 11. Clinic management: Manage an outpatients clinic | Level 3 able to act with indirect supervision | Level 4 able to act with supervision at a distance | Level 5 be able to supervise others |
| Know | 12. Scientific foundations of gastroenterology | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |

| | | Progression criteria | Completion criteria | |
|--|---|---|--|--|
| | Learning goals | Specialty foundation <i>By the end of this phase, trainees will:</i> | Specialty consolidation <i>By the end of this phase, trainees will:</i> | Transition to fellowship <i>By the end of training, trainees will:</i> |
| | 13. Gastrointestinal emergencies | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 14. Upper gastrointestinal and small bowel luminal disease | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 15. Lower gastrointestinal, luminal, and anal conditions | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 16. Liver disease/hepatology | Level 3 knows how to apply this knowledge to practice | Level 4 frequently shows they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 17. Pancreatic and biliary disease | Level 3 knows how to apply this knowledge to practice | Level 4 frequently shows they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 18. Inflammatory bowel disease | Level 3 knows how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 19. Gastrointestinal cancer | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 20. Function and motility | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |
| | 21. Nutrition | Level 3 know how to apply this knowledge to practice | Level 4 frequently show they apply this knowledge to practice | Level 5 consistently demonstrate application of this knowledge to practice |

Developmental & psychosocial training (Paediatrics & Child Health Division)

Purpose

Developmental and Psychosocial (D&P) Training assists trainees to develop a sophisticated understanding of child development, encompassing physical, cognitive, emotional, behavioural and social areas, which should be gained from the perspective of the child within the family and in the context of the community.

A mandatory period of D&P Training for all paediatricians was introduced to ensure that the changing nature of paediatric practice is reflected in the training programs. D&P is a requirement for all paediatric trainees to receive FRACP and may be completed during either Basic or Advanced Training.

Review of D&P

The College is working to redefine how D&P training will be embedded in the new training programs. This will include defining learning goals, and new options for trainees to achieve these learning goals, which will be embedded into the Basic and Advanced Training programs.

Alternative options for completing D&P training and a timeline for implementation will be communicated when available. New D&P requirements will be developed, and any updates will be included in the relevant curricula standards and learning, teaching and assessment programs. Trainees and supervisors will be informed of updates with sufficient notice of any changes to ensure no disadvantage.

Until alternatives are available, **it is important that trainees plan to complete the requirement for D&P training through one of the time-based options currently available, to ensure eligibility for admission to Fellowship on completion of the requirements of Advanced Training.** Trainees must satisfactorily complete this requirement to be eligible for admission to Fellowship under the Paediatrics & Child Health Division.

Aotearoa New Zealand

Requirement

The Developmental and Psychosocial (D&P) requirement can be met by completing a 3 month full-time equivalent rotation in relevant specialties or by documenting the management of suitable cases in a logbook.

Options available

Option A: 3 month FTE rotation

The specialties listed below outline the suitable rotations to meet this requirement.

- Adolescent medicine
- Child protection and adolescent psychiatry
- Community paediatrics
- Developmental/behavioural paediatrics
- Disability/rehabilitation paediatrics

Rotations not suitable for D&P Training:

- Paediatric gastroenterology*
- Paediatric neurology**

* Exceptions may be possible if rotation is specifically designed to have a D&P Training focus. However, this would be unlikely in Basic Training and would require specific prospective approval.

** Rotation usually not possible unless there is significant developmental focus. Not possible at SHO level.

These areas reflect a holistic approach to the health problems of children and young people. An understanding of the roles and inter-relationships of many allied health and community-based services, in a way that distinguishes them from experience in organ-based specialties, is required.

Option B: documentation of suitable cases in a logbook

Alternatively, trainees can gain the required training by managing suitable cases over a longer period with appropriate supervision. All training must be documented in a logbook.

Trainees must keep a record of at least 12 cases they have personally managed under supervision.

Logbook entries must cover a range of conditions:

- developmental problems, with a focus on the response of parents, families and caregivers to the diagnosis and ongoing care of the child with special needs.
- pervasive developmental disorders.
- general learning disability — the behaviour problems that arise secondary to this condition.
- chronic illness — behavioural and psychological problems resulting from chronic illness, and parent and family difficulties resulting from chronic conditions, such as diabetes, epilepsy, chronic arthritis, chronic respiratory disease, physical disability and childhood cancer.
- common behavioural paediatric problems such as enuresis, encopresis, sleep disturbance, eating difficulties, attention deficit and hyperactivity disorder, conduct disorder, anxiety, depression, and pre-school behavioural adjustment disorders.

Trainees are to provide a summary of the issues involved in each case and how they were managed. Copies of clinical letters are not appropriate.

Cases will generally accumulate over a 2-year period and each case record must be signed by the supervisor.

Resources

[Psychosocial Logbook example](#) text (PDF)

[Psychosocial Logbook template](#) (XLS)

Australia

Requirement

Developmental & psychosocial (D&P) training is currently a time-based requirement consisting of a minimum of six months full-time equivalent (FTE) in one or more of the following areas:

- Developmental/behavioural paediatrics
- Community paediatrics
- Disability/rehabilitation paediatrics
- Child and adolescent psychiatry
- Child protection
- Palliative medicine

These areas reflect a holistic approach to the health problems of children and young people. An understanding of the roles and inter-relationships of many allied health and community-based services, in a way that distinguishes them from experience in organ-based specialties, is required.

Options available

Approved training options

- **Option A: A prospectively-approved psychosocial training position (6 months full-time equivalent).** This can be completed as:
 - 2 x 3-month terms, or
 - 1 x 6-month block, or
 - a continuous part-time position, such as 2.5 days a week for 12 months (A conglomerate of experience for shorter time periods adding up to 6 months will not be accepted.)
- **Option B: A prospectively approved rural position (6 months full-time equivalent).** Complete the 6 months of training comprised of a documented weekly program in the psychosocial training areas with an appropriate level of supervision.
- **Option C: Attendance at a prospectively-approved clinic AND completion of an approved learning module.** The D&P training requirement can be completed in one of these formats:
 - 2 x sessions a week for 18 months, or
 - 1 x session a week for 3 years

An approved clinic is determined to be a clinic where other health and/or educational professionals are involved, and supervision is directed by a paediatrician who is experienced in one or multiple areas of D&P Training, such as behaviour, development, rehabilitation and child protection.

The approved learning module may be **one** of the following:

- Evidence of attendance at a lecture series at a recognised institution, related to the D&P Training areas; or
- 3 x referenced case reports/essays demonstrating comprehensive understanding of 3 different issues in the areas of psychosocial training – for example rehabilitation or community paediatrics (1500 to 2000 words each); or
- Completion of the Griffith Mental Developmental Scales course.

Other prospectively approved modules may be considered.

Aotearoa New Zealand and Australia

How to complete it

Trainees must provide details of how they completed the Developmental & Psychosocial (D&P) training requirement by submitting information via [TMP](#) as a Learning theme.

To do this, trainees must:

1. Nominate the corresponding requirement option that was completed
2. Provide relevant supporting details. This may include:
 - referencing the rotation plan if the training was completed as part of an applicable subspecialty term.
 - describing the approved rural or clinic-based setting.
 - listing the approved learning module undertaken and associated evidence (e.g. attendance records, case reports).
 - upload completed documentation as required.

How to apply

Contact Gastroenterology@racp.edu.au or Gastroenterology@racp.org.nz to apply for approval of D&P Training.

Resources

[Developmental and Psychosocial Training Supervisor's Report form \(DOC\)](#)

Learning, teaching, and assessment requirements

Overview

Requirements over the course of training

| What do trainees need to do? | When do trainees need to do it? |
|---|--|
| Entry | |
| 1 training application | At the start of the specialty foundation phase. Due 28 February if starting at the beginning of the year and 31 August if starting mid-year. |
| Learning | |
| Minimum 36 months full time equivalent (FTE) professional experience | Minimum 12 months FTE during each phase. |
| RACP Advanced Training Orientation resource | During the first 6 months of the specialty foundation phase. |
| RACP Supervisor Professional Development Program | Before the end of Advanced Training. |
| RACP Australian Aboriginal, Torres Strait Islander and Māori Cultural Competence and Cultural Safety resource | Before the end of Advanced Training, if not completed during Basic Training. Recommended completion before the specialty consolidation phase. |
| RACP Health Policy, Systems and Advocacy resource | Before the end of Advanced Training. Recommended completion before the transition to fellowship phase. |
| Recommended resources | Recommended completion over the course of Advanced Training. |
| Teaching | |
| Nominate 1 research project supervisor | Recommended to be nominated before the specialty consolidation phase. |
| Assessment | |
| 1 research project | Before the end of Advanced Training. Recommended submission before the transition to fellowship phase. |

Requirements per phase

| What do trainees need to do? | When do trainees need to do it? |
|---|--|
| Learning | |
| 1 rotation plan per rotation | At the start of (or prior to starting) the rotation. Due 28 February for rotations in the first half or whole of the year and 31 August for rotations in the second half of the year. |
| Teaching | |
| Nominate 2 supervisors per rotation | At the start of each accredited or approved training rotation. |
| Assessment | |
| 12 learning captures | Minimum 1 per month. |
| 12 observation captures | Minimum 1 per month. |
| 4 progress reports | Minimum 1 every 3 months. |

Entry

Training application

Requirement

1 x training application, at the start of the specialty foundation phase.

Purpose

The training application supports trainees to:

- confirm that they meet the program [entry criteria](#)
- provide essential details for program enrolment, ensuring compliance with RACP standards
- establishes a formal foundation for their training pathway, enabling access to program resources and support

The application form will be reviewed by the RACP staff. Trainees will be able to track the status of your application through the College's new Training Management Platform (TMP).

Trainees can submit rotation plans and complete assessments while waiting for their application to be approved.

How to apply

Trainees are to submit a training application for the program using [TMP](#).

Due dates

- **28 February** if starting at the beginning of the year.
- **31 August** if starting mid-year.

Learning

Professional experience

| Professional experience | |
|--|-------------------|
| Complete at least 36 months of relevant professional experience in approved rotations. | |
| Location of training | |
| <ul style="list-style-type: none">Complete training in at least 2 different accredited training settings, spending no longer than 24 months in a single setting (required for Adult Medicine trainees, recommended for Paediatrics and Child Health trainees).Complete at least 24 months of training in Australia and/or Aotearoa New Zealand. | |
| Experiential requirements | |
| Type of training | Time requirement |
| Core training Core training must be undertaken in gastroenterology rotations in RACP-accredited settings. It includes a minimum of 12 months of on-call/out-of-hours experience every fourth weekend. | 24 months minimum |
| Non-core training Non-core training is prospectively approved on a case-by-case basis. It may be undertaken in: <ul style="list-style-type: none">Clinical training that is closely related to gastroenterologyGastroenterology research | 12 months maximum |

Rotation plan

| Requirement |
|--|
| 1 x rotation plan per rotation. |
| Description |
| The rotation plan is a work-based tool to document details of a training rotation and how a trainee intends to cover their program learning goals over the rotation period. |
| Purpose |
| The rotation plan helps trainees evaluate their learning gaps, curriculum needs, and local opportunities to meet expected standards. It is validated by College staff to ensure it aligns with the professional experience requirements for the program. |
| How to complete it |

Trainees can submit a rotation plan in [TMP](#) under the training plan tab.

Trainees undertaking their first rotation of their training program must select the following checkbox, 'The rotation start date is also the start date of my Training Program' to record the start date for their training program.

If a trainee is expecting a learning goal to be covered during a rotation, select 'yes' for 'coverage offered' and outline the learning opportunities available. See this [completed rotation plan](#) for examples of the learning opportunities that may be available for each learning goal.

This information will be used by supervisors and overseeing RACP training committee to determine the relevance of the rotation to the program's professional experience requirements.

Trainees should upload a copy of the position description and any other supporting information that outlines the training position being undertaken. This should include regular/weekly activities that the trainee will be undertaking during the rotation (e.g. timetable).

Trainees can also set custom goals to define personal objectives that they want to achieve during the rotation. These goals should be measurable and align with the trainee's professional objectives, skill gaps, or personal interests.

Trainees need to nominate their rotation supervisors in the plan, and they will need to approve the plan in TMP via 'my assigned actions'.

For more information on how to complete a rotation plan review the [training resources](#).

Due dates

- **28 February** for rotations in the first half or whole of the year.
- **31 August** for rotations in the second half of the year.

Courses

RACP Advanced Training Orientation resource

| Requirement |
|---|
| 1 x RACP Advanced Training Orientation resource, completed during the first 6 months of the specialty foundation phase. |
| Description |
| This resource is designed to orient trainees to Advanced Training. It covers areas such as transition to Advanced Training, training and assessment, and trainee support. It's a 'one-stop shop' that trainees can return to if they ever want to find a useful resource, or need a refresher on the supporting resources, policies, and systems available to them. |
| Purpose |
| The resource is intended to support trainees to successfully navigate their transition to Advanced Training and prepare for unsupervised practice as a specialist physician. |

How to complete it

Trainees can complete the [Advanced Training Orientation resource](#) on RACP Online Learning.

Trainees will receive a certificate of completion on RACP Online Learning when they complete the resource. Completion of this requirement will automatically update in [TMP](#).

RACP Supervisor Professional Development Program

Requirement

1 x RACP Supervisor Professional Development Program (SPDP), consisting of 3 workshops, completed by the end of Advanced Training.

Description

The SPDP consists of 3 workshops:

- Practical skills for supervisors
- Teaching and learning in healthcare
- Work-based learning and assessment.

See [Supervisor Professional Development Program](#) for more information on the program.

Purpose

This requirement aims to prepare trainees for a supervisory/educator role in the workplace and supports trainees' learning aligned with the "team leadership" and "supervision and teaching" learning goals.

How to complete it

[Register for a supervisor workshop.](#)

Trainees can complete the SPDP in three ways:

- Virtual workshops
- Face-to-face workshops
- Online courses.

Workshops are free and presented by volunteer Fellows trained in SPDP facilitation.

RACP Australian Aboriginal, Torres Strait Islander and Māori Cultural Competence and Cultural Safety resource

Requirement

1 x Australian Aboriginal, Torres Strait Islander and Māori Cultural Competence and Cultural Safety resource, if not completed during Basic Training.

Trainees must complete the resource by the end of their Advanced Training however it's recommended they complete it before the specialty consolidation phase.

Description

The Australian Aboriginal, Torres Strait Islander and Māori Cultural Competence and Cultural Safety resource teaches best practice medicine for Aboriginal, Torres Strait Islander and Māori patients through reflection on the trainee's own cultural values and recognition of their influence on professional practice.

Estimated completion time: 2 hours.

Purpose

This resource supports trainees' learning aligned with the "professional behaviours" learning goal. Specialist training requires trainees to:

- examine their own implicit biases
- be mindful of power differentials
- develop reflective practice
- undertake transformative unlearning
- contribute to a decolonisation of health services for Indigenous peoples

How to complete it

Trainees can complete the [Australian Aboriginal, Torres Strait Islander and Māori Cultural Competence and Cultural Safety resource](#) on RACP Online Learning.

Trainees will receive a certificate of completion on RACP Online Learning when they complete the resource. Completion of this requirement will automatically update in [TMP](#).

RACP Health Policy, Systems and Advocacy resource

Requirement

1 x RACP Health Policy, Systems and Advocacy resource, completed by the end of Advanced Training.

Description

This resource has been designed for Advanced Trainees, as an introduction to health policy, systems, and advocacy.

Estimated completion time: 5 hours.

Purpose

The resource aims to support Advanced Trainees in meeting the health policy, systems, and advocacy professional standard and underpinning competencies outlined in their specialty curriculum, and to enable connections between Advanced Trainees' own practice and the nature and attributes of local, national, and global health systems.

How to complete it

Trainees can complete the [RACP Health Policy, Systems and Advocacy resource](#) on RACP Online Learning.

Trainees will receive a certificate of completion on RACP Online Learning when they complete the resource. Completion of this requirement will automatically update in [TMP](#).

Recommended resources

- [RACP Communication Skills resource](#)

Teaching

Supervision

Rotation supervisors

Trainees are to have 2 x supervisors per rotation:

- 1 supervisor, who is a Fellow of the RACP and a practising gastroenterologist
- 1 supervisor, who is a Fellow of the RACP (or equivalent if at an overseas training setting)

Nominating eligible supervisors

Trainees will be asked to nominate rotation supervisors as part of their rotation plan. Trainees are required to nominate [eligible supervisors](#) who meet the above requirements.

A list of eligible supervisors can be found on [MyRACP](#). The list is not available for post-Fellowship trainees. Post-Fellowship trainees can [contact us](#) to confirm supervisor eligibility.

Research project supervisor

Trainees are to nominate 1 x research project supervisor over the course of Advanced Training. Recommended to be nominated before the specialty consolidation phase.

The research project supervisor guides trainees with their project choice, method, data analysis and interpretation, and quality of written and oral presentation.

More information about this role can be found in the [Advanced Training research project guidelines](#).

Assessment

Assessment blueprint

This high-level assessment program blueprint outlines which of the learning goals (and associated curricula standards) *could be* and *will be* covered by the assessment tools.

| Learning goals | Assessment tools | | | |
|--|-------------------------|----------------------------|------------------------|-------------------------|
| | Learning capture | Observation capture | Progress report | Research project |
| 1. Professional behaviours | Could assess | Could assess | Will assess | Will assess |
| 2. Team leadership | Could assess | Could assess | Will assess | x |
| 3. Supervision and teaching | Could assess | Could assess | Will assess | x |
| 4. Quality improvement | Could assess | Could assess | Will assess | Could assess |
| 5. Clinical assessment and management, including prescribing | Could assess | Could assess | Will assess | x |
| 6. Acute care | Could assess | Could assess | Will assess | x |
| 7. Longitudinal care, including transitions and end-of-life | Could assess | Could assess | Will assess | x |
| 8. Communication with patients | Could assess | Could assess | Will assess | x |
| 9. Procedures | Could assess | Could assess | Will assess | x |
| 10. Investigations | Could assess | Could assess | Will assess | x |
| 11. Clinic management | Could assess | Could assess | Will assess | x |

| Assessment tools | | | | |
|---|------------------|---------------------|-----------------|------------------|
| Learning goals | Learning capture | Observation capture | Progress report | Research project |
| 12. Scientific foundations of gastroenterology | Could assess | Could assess | Will assess | x |
| 13. Gastrointestinal emergencies | Could assess | Could assess | Will assess | x |
| 14. Upper gastrointestinal and small bowel luminal disease | Could assess | Could assess | Will assess | x |
| 15. Lower gastrointestinal, luminal, and anal conditions | Could assess | Could assess | Will assess | x |
| 16. Liver disease/hepatology | Could assess | Could assess | Will assess | x |
| 17. Pancreatic and biliary disease | Could assess | Could assess | Will assess | x |
| 18. Inflammatory bowel disease | Could assess | Could assess | Will assess | x |
| 19. Gastrointestinal cancer | Could assess | Could assess | Will assess | x |
| 20. Function and motility | Could assess | Could assess | Will assess | x |
| 21. Nutrition | Could assess | Could assess | Will assess | x |

Learning capture

| Requirement |
|---|
| 12 x learning captures per phase of training, minimum 1 per month. <i>Refer to RACP Flexible Training Policy for further information on part-time training (item 4.2).</i> |
| Description |
| The learning capture is a work-based assessment that involves a trainee capturing, and reflecting on, professional development activities, including evidence of work-based learning linked to specific learning goals. |
| Purpose |
| The learning capture assists trainees to reflect on experiences, promotes critical thinking, and connects these to a trainee's learning goals and professional development. It is also a valuable mechanism for trainees to enhance their understanding of complex topics and less common experiences that may be difficult to encounter in traditional training. |
| How to complete it |
| The learning capture is completed via TMP under the assessment requirements tab. For more information on how to complete a learning capture review the training resources . |

Observation capture

| Requirement |
|---|
| 12 x observation captures per phase of training, minimum 1 per month. <i>Refer to RACP Flexible Training Policy for further information on part-time training (item 4.2).</i> |
| Description |
| An observation capture is a work-based assessment which provides a structured process for trainees to demonstrate their knowledge and skills in real-time workplace situations, while assessors observe and evaluate performance. |
| Purpose |
| The purpose of the observation capture is to assess skill development, track progress, and provide targeted feedback for improvement for trainees against specific learning goals. |
| How to complete it |
| Observation captures are completed via TMP under the assessment requirements tab. For more information on how to complete an observation capture review the training resources . |

Progress report

Requirement

4 x progress reports per phase of training, minimum 1 every 3 months.

Refer to [RACP Flexible Training Policy](#) for further information on part-time training (item 4.2).

Description

A progress report is an assessment that documents trainees' and supervisors' assessment of trainee progress against the training program learning goals over a period of training.

Purpose

Progress reports assess knowledge and skill development, track progress against the phase criteria, and provide targeted feedback for improvement.

How to complete it

Progress reports are completed via [TMP](#) under the assessment requirements tab.

Trainees must:

- self-assess against the program's learning goals
- record any leave taken during the covered training period
- provide summary comments about the rotation

For more information on how to complete a progress report review the [training resources](#).

Research project

Requirement

1 x research project over the course of Advanced Training.

Description

The research project should be one with which the trainee has had significant involvement in designing, conducting the research and analysing data. Trainees may work as part of a larger research project but must have significant input into a particular aspect of the study.

Research projects are not required to be specialty-specific but are required to be broadly relevant to trainees' area of specialty. Broadly relevant can be defined as topics that can enhance, complement and inform trainees' practice in the chosen specialty.

Three types of research projects are accepted:

Three research project types are accepted:

- research in:
 - human subjects, populations and communities and laboratory research
 - epidemiology
 - education
 - leadership
 - medical humanities
 - areas of study which can be applied to care of patients or populations
- audit
- systematic review

The trainee must have a research project supervisor who may or may not be one of their rotation supervisors.

The research project is marked by the training committee as pass, fail or resubmit and trainees receive qualitative feedback about their project. The research project should be submitted for marking by the end of the specialty consolidation phase to allow time for resubmission in the transition to Fellowship phase if the project is unsatisfactory.

Purpose

The research project enabled trainees to gain experience in research methods; in interpretation of research literature; in participation in research at some stage of their career; and to develop quality improvement skills. Submission of a research project provides evidence of the skills of considering and defining research problems; the systematic acquisition, analysis, synthesis and interpretation of data; and effective written communication.

How to complete it

Detailed information on how to complete the research project can be found in the [Advanced Training research project guidelines](#) and can be submitted via [TMP](#) under the assessment requirements tab.

For more information on how to submit an Advanced Training Research Project review the [training resources](#).

There are 3 deadlines that must be followed when submitting an Advanced Training Research Project. Trainees can choose to submit their Research Project on any of these 3 dates during the year.

Australia: 31 March, 15 June, or 15 September.

Aotearoa New Zealand: 31 March, 15 June, or 15 December.

Roles and responsibilities

Advanced Trainee

| Role |
|---|
| A member who is registered with the RACP to undertake one or more Advanced Training programs. |
| Responsibilities |
| <ul style="list-style-type: none">• Maintain employment in accredited training settings.• Act as a self-directed learner:<ul style="list-style-type: none">○ be aware of the educational requirements outlined in the relevant curricula and education policies○ actively seek and reflect on feedback from assessors, supervisors, and other colleagues○ plan, reflect on, and manage their learning and progression against the curricula standards○ adhere to the deadlines for requirements of the training program.• Actively participate in training setting / network accreditation undertaken by the RACP.• Complete the annual Physician Training Survey to assist the RACP and training settings with ongoing quality improvement of the program. |

Rotation supervisor

| Role |
|--|
| A consultant who provides direct oversight of an Advanced Trainee during a training rotation. |
| Responsibilities |
| <ul style="list-style-type: none">• Be aware of the educational requirements outlined in the relevant curricula and education policies.• Oversee and support the progression of Advanced Trainees within the setting:<ul style="list-style-type: none">○ Assist trainees to plan their learning during the rotation.○ Support colleagues to complete observation captures with trainees.○ Provide feedback to trainees through progress reports.• Actively participate in rotation accreditation undertaken by the RACP.• Complete the annual Physician Training Survey to assist the RACP and training settings with ongoing quality improvement of the program. |

Assessor

| Role |
|---|
| A person who provides feedback to trainees via the Observation Capture or Learning Capture tool. This may include consultants and other medical professionals, allied health professionals, nursing staff, patients and their families, administrative staff, and consumer representatives. |
| Responsibilities |
| <ul style="list-style-type: none">• Be aware of the learning goals of the training program.• Provide feedback to support the progression of Advanced Trainees within the setting:<ul style="list-style-type: none">○ Complete Observation Captures.○ Provide feedback on Learning Captures as required. |

Progress Review Panel

| Role |
|--|
| A Progress Review Panel is a group convened to meet and make evidence-based decisions on trainees' progression through training. |
| Progress Review Panels ensure the integrity and transparency of progression and completion decisions related to Basic and Advanced Trainees. |
| Panels are considered experts in the training program, including the curriculum standards, requirements, and administration of the program. |
| Responsibilities |
| <ol style="list-style-type: none">1. Make decisions on progression for all trainees in a training program. The panel will assess if trainees have met or are on track to meet the expected standard for their phase of training, including the completion of learning, teaching and assessment requirements.2. Manage trainee conditions to enable trainees to progress by reviewing trainee performance. Where required, panels will set conditions for trainees to meet, with the goal of helping trainees achieve the program learning goals and progression or completion criteria. |

Types of Progress Review Panels

There are two types of RACP Progress Review Panels:

- Primary panel: A primary Progress Review Panel is an RACP committee supported by an RACP staff member. Primary panels are existing Training Program Committees/Subcommittees and will have Progress Review Panel functions included as part of their operations and delegations.
- Secondary panel: These are local panels typically set up within a specific training setting, network, or geographic area. These panels will make progression decisions on behalf of the Training Program Committee and manage conditions placed on trainees.

Trainees will be able to review the panels they are assigned to in the TMP.

Trainee progress decisions, conditions and feedback

- Panels will monitor and review trainee progress and make a phase progression decision.
- Panels may add training conditions that trainees need to meet to progress in training or during their next phase of training.
- Trainees will be able to view progression decisions, conditions and panel feedback on the trainee progress tab in TMP.

RACP oversight committees

Role

RACP-administered committees with oversight of the Advanced Training Program in Australia and New Zealand. This includes the relevant training committee and/or Aotearoa New Zealand training subcommittee.

Responsibilities

- Oversee implementation of the Advanced Training program in Australia and Aotearoa New Zealand:
 - Manage and review program requirements, accreditation requirements, and supervision requirements.
 - Monitor implementation of training program requirements.
 - Implement RACP education policy.
 - Oversee trainees' progression through the training program.
 - Monitor the accreditation of training settings.
 - Case manage trainees on the Training Support pathway.
 - Review progression and certification decisions on application in accordance with the RACP Reconsideration, Review, and Appeals By-Law.
- Work collaboratively with secondary Progress Review Panels, where applicable to ensure the delivery of quality training.
- Provide feedback, guidance, recommendations, and reasoning for decision making to trainees and supervisors.
- Declare conflicts of interest and excuse themselves from decision making discussions when conflicts arise.
- Report to the overseeing RACP committee as required.
