RACP Specialists. Together
EDUCATE ADVOCATE INNOVATE

Clinical Immunology and Allergy at-a-glance

NEW CURRICULA

About the specialty

Clinical Immunology and Allergy focuses on diagnosing and managing disorders of the immune system, including allergies, immunodeficiencies and autoimmune diseases. Immunologists provide personalised treatment and ongoing patient care.

Immune disorders
Diagnosing and managing autoimmune disease and immunodeficiency.

Allergy & hypersensitivity
Assessing and treating allergies and hypersensitivity reactions.

Personalised care
Tailoring treatments, including medications and immunotherapy, to individual needs.

ENTRY REQUIREMENTS

Completion of RACP Basic Training, including the Written and Clinical Examinations, general medical registration, and an Advanced Training position in an RACP-accredited training setting or network, or an approved non-core training position.

KEY RESOURCES

- **What you'll need to learn:** Curriculum standards
- **How you'll learn and demonstrate achievement of the standards:** Learning, teaching and assessment program (LTA)
- **Where you can train:** Accredited settings
- **What resources are available:** RACP Online Learning resources
- **Immunology & Allergy specific resources:** Specialty-specific resources
- **Access to the TMP:** Training Management Platform

Your training experience

36 **months** minimum full time

3 **phases** of training

18 **learning** goals

LEARNING GOALS

BE	1. Professional behaviours
DO	2. Team leadership 3. Supervision and teaching 4. Quality improvement 5. Clinical reasoning in diagnosis and management 6. Management of transitions in care 7. Acute care 8. Longitudinal care 9. Communication with patients 10. Prescribing 11. Investigations and procedures 12. Clinic management
KNOW	13. Foundations of immunology, diagnostics, and therapeutics 14. Immunodeficiency 15. Autoimmune and autoinflammatory disease 16. Allergy and hypersensitivity reactions 17. Transplantation 18. Vaccination

For full details, view the curriculum standards and LTA programs

Assessment & outcomes

PER PHASE – what you need to compete

1 PER ROTATION	**Rotation plan** Set learning goals with your supervisor
12 PER PHASE	**Learning captures** Reflect on a learning encounter
12 PER PHASE	**Observation captures** Be observed performing a work-based activity
4 PER PHASE	**Progress reports** Self-rate & be assessed against all learning goals

OVER THE COURSE OF TRAINING

- ✓ Developmental & psychosocial training*
- ✓ 1 research project
- ✓ Learning courses

*Paediatrics & Child Health only

PROGRESSION

At the end of each phase, the Progress Review Panel makes a decision based on evidence of competence, completion of requirements, and your Rotation Supervisor's recommendation.

QUALIFICATION

Fellow of the Royal Australasian College of Physicians (FRACP)
Advanced Training — Clinical Immunology and Allergy
