## Overview | What is a Rotation Plan?

**Definition:** A work-based tool to document details of a training rotation and how the trainee intends to cover their program learning goals over the rotation period.

**Purpose:** The rotation plan enables trainees to self-assess learning gaps, curriculum needs, and local opportunities, fostering a shared understanding of rotation goals with the supervisor. The Rotation Plan will help to determine how time spent in training meets the clinical or professional experience requirements for a program.

**Frequency:** Trainees are required to complete 1 Rotation plan per rotation, equating to 4 Rotation plans per phase.

## Workflow | What's involved in a Rotation Plan?

### Trainee initiates

- Identify Rotation Plan information
- Add rotation supervisor details (this can be done at a later stage)
- Identify which learning goals are expected to be covered during the rotation (curriculum coverage)

### Supervisor verifies

- The nominated rotation supervisor reviews the plan to ensure the rotation information is accurate.
- Supervisor returns rotation plan back to trainee

## Selection | How to choose learning goals for the upcoming rotation.

- 1. Review learning goals**  
Consider which goals may be achievable in this setting
- 2. Identify rotation-specific opportunities**  
Brainstorm tasks and cases that could support specific goals
- 3. Goal selection**  
Select 4-5 goals, including knowledge and professional behaviours
- 4. Clinical or professional experience requirements**  
Ensure that the rotation/s to be undertaken meet the program requirements
- 5. Prepare for assessment**  
Plan for how you'll progress and check in on these goals throughout the rotation
- 6. Align with phase progression**  
Ensure selected goals support your end-of-phase progression and that you will cover all goals over the entire phase

### Basic training learning goal focus - general medicine rotation

- ✓ 5 learning goals selected
- ✓ Knowledge included
- ✓ Professional behaviours (competencies) expected to be applied to every work task
- ✓ Learning and development opportunities outlined
- ✓ Assessment tools and phase progression considered

#### Learning goal: Clinical Assessment Opportunities:

- Ward rounds
- Handovers
- Teaching medical students

#### Learning goal: Communication with patients Opportunities:

- Family meetings
- Observing a senior trainee
- Explaining a new diagnosis

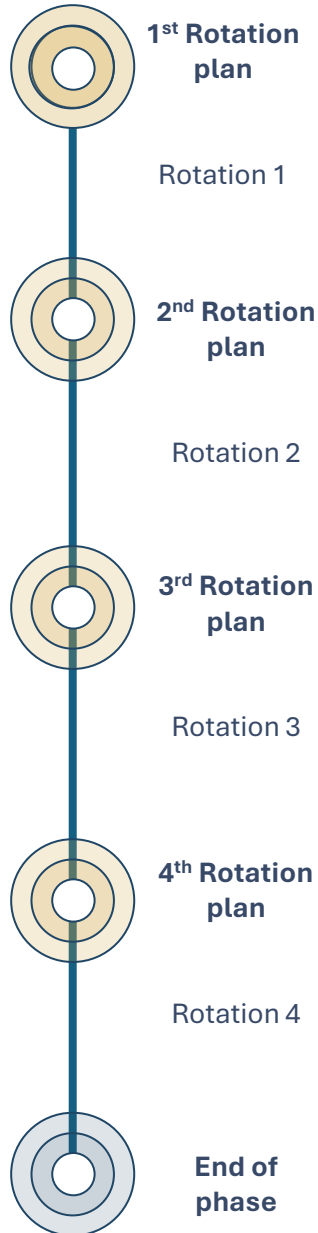

#### Learning goal: Documentation Opportunities:

- Discharge summaries
- Outpatient letter
- Referrals

#### Learning goal: Knowledge Opportunities:

- General medicine

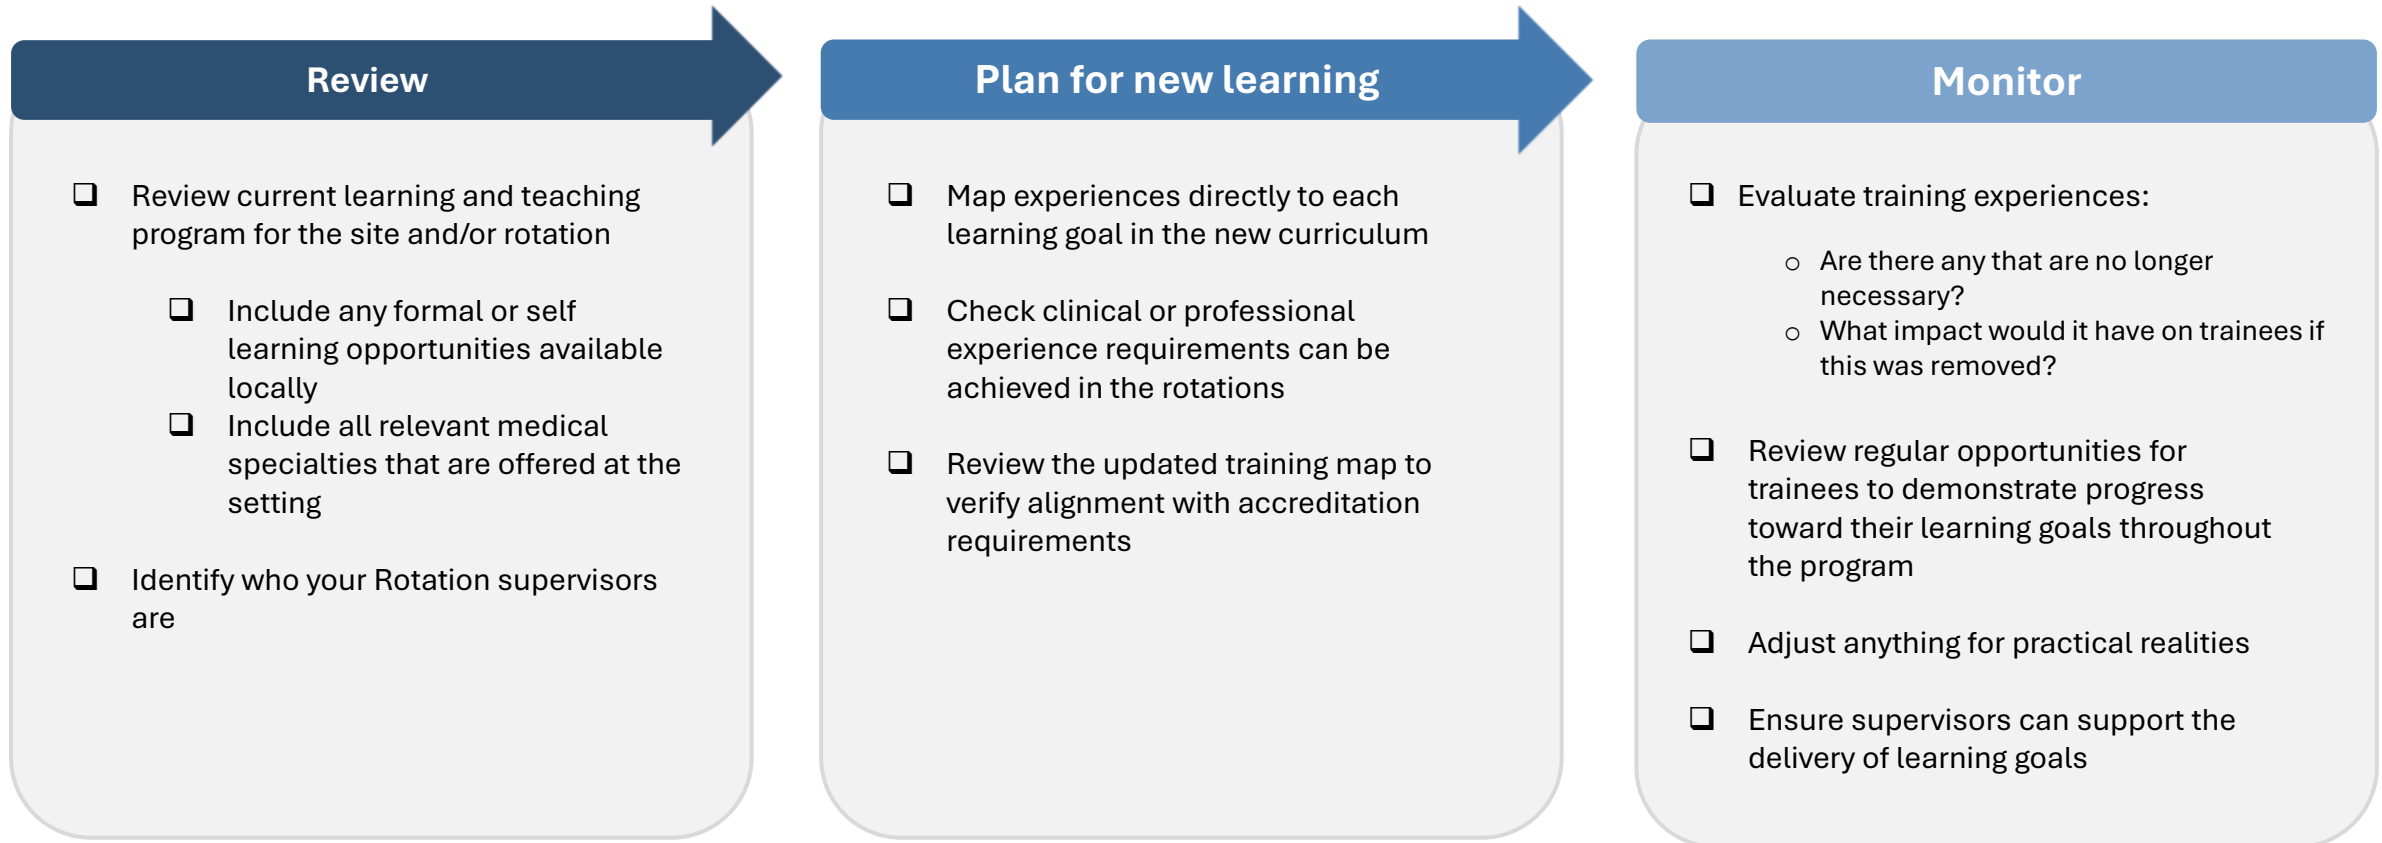

### Phase\*

Curriculum mapping can be done at both a general and rotation-specific level.

**General mapping:** DPEs outline the training opportunities available across the entire setting or network.

**Rotation-specific mapping:** Rotation supervisors specify the training opportunities relevant to their rotation.

The RACP e-learning platform provides training and resources to support trainees, supervisors and DPEs to use the new curriculum learning goals and assessments including on demand workshops, TMP user instructions, information packages and a curriculum mapping template. *Please contact the RACP if you have an additional support need.*

Learning goals define the knowledge, skills and understanding that trainees need to develop.

The learning goals are designed to allow trainees to demonstrate knowledge, skills and understanding through real tasks.

Through these tasks, trainees practice clinical and professional skills, building competency by connecting past experiences with new learning.

Trainees are supported in achieving these learning goals through guidance on available work tasks and activities at each setting.

**1. Identify available work tasks for trainees to engage in.**

For example; ward rounds

**2. Consider the skills needed to perform each task.**

In a ward round, trainees will display communication with patients, bedside clinical skills, teaching junior staff, clinical knowledge to answer questions and look at investigation results.

**3. Determine the task type: General or Rotation-specific**

Ward rounds are usually available across all departments and all levels of training offered.

*Rotation-specific example: Gastroenterology clinic only offered to trainees on a gastroenterology rotation*

**4. Map tasks to relevant learning goals using the template.**

For example, Professional behaviours, Clinical assessment, Communication with patients, Documentation, Prescribing or Knowledge

**5. Identify and highlight learning goals not covered.**

Make trainees aware of this to ensure they gain coverage across their program

**Linking learning opportunities to goals** | Identifying rotation-specific opportunities related to selected learning goals

Type of learning opportunities		Learning Goals		
		02. Clinical assessment	03. Communication with patients	04. Documentation
<b>Practice</b>	practicing a task or a component of a task	<ul style="list-style-type: none"> <li>• Ward rounds</li> <li>• Handovers</li> <li>• Teaching medical students</li> </ul>	<ul style="list-style-type: none"> <li>• Taking a patient history and asking questions pertinent to the case</li> </ul>	<ul style="list-style-type: none"> <li>• Writing up case notes to a chart or online system during and after a patient consultation.</li> </ul>
<b>Discussion and collaboration</b>	working and collaborating with an inter-disciplinary team resolve issues	<ul style="list-style-type: none"> <li>• Case discussions or Q&amp;A sessions run by the lead registrar at the start of a ward round</li> </ul>	<ul style="list-style-type: none"> <li>• Participate in family meetings with a multi-disciplinary team</li> </ul>	<ul style="list-style-type: none"> <li>• Contacting a colleague from another specialty for advice and adding to patient history notes</li> </ul>
<b>Production</b>	producing materials that show evidence of learning	<ul style="list-style-type: none"> <li>• Discharge summaries</li> </ul>	<ul style="list-style-type: none"> <li>• Information packs or print outs for patients to refer to outside of a consultation</li> </ul>	<ul style="list-style-type: none"> <li>• Outpatient letters</li> <li>• Referrals</li> </ul>
<b>Acquisition and inquiry</b>	investigating and researching information that reflect concepts being learnt	<ul style="list-style-type: none"> <li>• Attending on site clinically-based lectures delivered</li> </ul>	<ul style="list-style-type: none"> <li>• Observe a senior trainee giving discharge information or explaining a new diagnosis</li> </ul>	<ul style="list-style-type: none"> <li>• Review local handover framework used for updating colleagues starting their shift at a setting</li> </ul>

Example trainee rotation map of completed activities

Rotation 1 - General medicine

Learning goal focus

i.e., 4-5 LGs including knowledge and professional behaviours per quarter

- Professional behaviours
- Clinical assessment
- Communication with patients
- Documentation
- Knowledge

Learning opportunities identified

- Ward rounds
- Family meetings
- Handovers
- Teaching medical students
- Discharge summaries
- Outpatient letters
- Referrals

Learning Capture topics

- **Professional behaviours:** Review article about the cognitive bias that can impact on decision making
- **Knowledge:** Review an epidemiological study
- **Clinical assessment:** Reflect on a patient encounter

Observation Capture topics

- **Clinical assessment:** Examine a patient who has presented with vomiting and abdominal pain with focus on the physical exam
- **Documentation:** Handover documentation for the end of a shift
- **Communication with patients:** Explain a diagnosis to a patient who has received investigation results

Foundation phase

End of phase criteria

*\*Refer to the LTA for specific program progression criteria*

**To meet the learning goal component of the training requirements at the end of the Foundation phase**

The ability to consistently perform the following Entrustable Professional Activities with indirect supervision (level 3):

- Clinical assessment
- Communication with patients
- Documentation
- Prescribing
- Investigations
- consistent behaviour in line with each of the ten areas of professional practice.
- the understanding of how to apply medical knowledge to patient care (knows how).

**Observation Capture Outcome ratings from assessors**

- Level 2 – can act with direct supervision
- Level 3 – can act with indirect supervision
- Level 2 – can act with direct supervision

Case study | What does this look like in practical application?

Trainee initiates

Dr. Billie is starting in her Foundation phase. Dr Billie knows what setting she is going to be working at and has her rotations mapped out for the year. She is starting to complete her Rotation Plan for her first rotation which is a general paediatric rotation, which is a 3-month term.

Kerry Snow

**I can confirm that this trainee has been appointed the outlined training position \***

Select Yes

**I confirm that the training plan reflects the learning opportunities available to this trainee \***

Select Yes

**I confirm that correct supervisor details have been recorded \***

Select Yes

**Status**

Complete

**Review Completion Date**

31/01/25

**Review Finalised?**

**Return to Trainee?**

1. Review Rotation Plan details

1. Login to the TMP
2. Click on My trainees

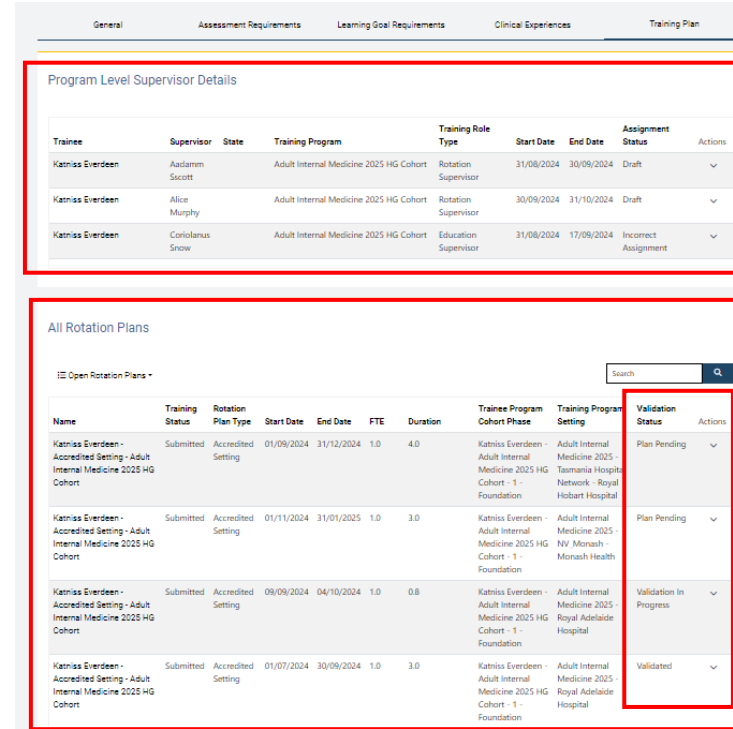

3. A list of trainees assigned to you will be displayed  
You will need to review each learning plan individually. You can use the search function to search for a trainee's name or click on their name

4. After the trainee record has opened, click Training Plan

5. The assigned supervisors will display at the top and all the rotation plans (current and complete) will be displayed on the bottom section.

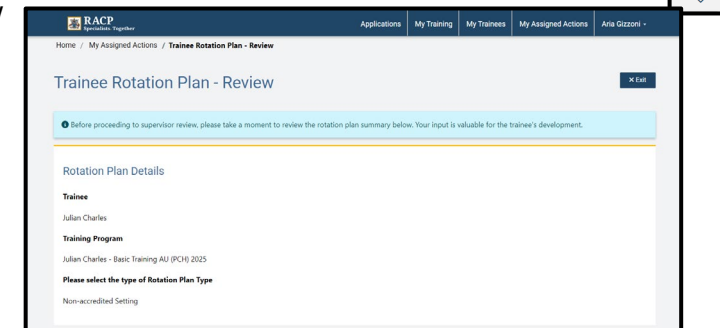

Supervisor details

Rotation Supervisor and Education Super – listed in role type

Rotation Plans

Status of the Rotation Plan. The plan will be validated once reviewed and confirmed by the Rotation Supervisor.

6. To review the information, click on the drop-down arrow in actions and select Review

**Can a Rotation plan be edited/updated after it has been submitted?**

Yes.

Trainees can edit a rotation plan, including learning goal opportunities and Rotation Supervisor(s), after it has been submitted. Not all fields can be edited, including the rotation type. The plan is not able to be edited after training time is certified.

**Are the rotation details prefilled for the trainees?**

No, trainees will need to add all rotation details to the Rotation plan.

**Does the Rotation Supervisor need to review/approve a Rotation plan?**

Yes, at least one nominated Rotation Supervisor will need to review/approve the trainee's Rotation plan.

**Is the Rotation Supervisor(s) nominated in the rotation plan the only users that can complete the rotation progress report?**

Yes, the Rotation Supervisor(s) nominated on the rotation plan are the only user(s) that can complete the rotation progress report, however the Rotation Supervisor can be updated at any time prior to this.

**Who will approve the rotation plan for Basic training?**

Rotation Supervisors will verify rotation plans for Basic Trainees. Trainees nominate their supervisors within the rotation plan. Rotation Supervisors are an equivalent role to the Ward Service Consultant under the PREP curricula.

**Can DPE's and medical education staff within the setting assign supervisors?**

For the time being, DPEs and Training Program Coordinators (TPCs) can update the Education Supervisor(s) for trainees within their relevant training settings.

**Do Advanced Trainees need both an Education Supervisor and Rotation supervisors?**

Advanced Trainees will only need to nominate Rotation Supervisors as part of their rotation plan.

Rotation Supervisors are equivalent to an Advanced Training (AT) supervisor under the PREP curricula.
