RACP Specialists. Together
EDUCATE ADVOCATE INNOVATE

Basic Training (Adult Medicine) at-a-glance

NEW CURRICULA

About the specialty

Adult Medicine Basic Training develops the knowledge, clinical skills and professional behaviours needed to care for adults with a broad range of medical conditions. Trainees gain experience across specialties & settings while preparing for Advanced Training.

Broad clinical experience
Care for patients with diverse and complex medical conditions.

Clinical decision-making
Assess patients, interpret investigations and develop management plans.

Preparing for specialisation
Build the foundation for Advanced Training and future physician practice.

ENTRY REQUIREMENTS

A Basic Training position in an RACP-accredited training setting or network, and general medical registration.
