

Trainee & Program Details

Training Program

Endocrinology (AM) 2026

Training Program Phase *

Specialty Foundation

Date of Observation *

18/05/2026

Observation Capture Details

Observation Capture Type *

Patient Case Management

Summary of Activity *

I assessed a patient with uncontrolled type 2 diabetes and possible thyroid dysfunction. I obtained history, performed a focused examination, reviewed pathology, and developed a provisional diagnosis. I discussed management options with the patient and carer and arranged follow-up investigations

Complexity *

3 - High

Primary Learning Goal *

5 - Clinical assessment and management

Learning Goal Components

Select the learning goal components observed during the Observation Capture.

Name	Observed	
Identify and access sources of relevant information about patient	Yes	No
Obtain patient histories	Yes	No
Examine patients	Yes	No
Synthesise findings to develop provisional and differential diagnoses	Yes	No
Discuss findings with patients, families and/or carers	Yes	No
Generate an investigation or management plan	Yes	No
Present findings to other health professionals	Yes	No

Trainee Reflection

The below section is to be filled in by the Trainee

What did you do well? *

I gathered a comprehensive history and performed a focused examination, which helped identify key endocrine issues. I communicated clearly with the patient and carer, ensuring they understood the management plan. I also collaborated effectively with the team to arrange follow-up investigations.

What could you improve next time? *

Next time, I will aim to structure the discussion more efficiently and summarise key points earlier to keep the consultation within time limits. I also plan to refine my approach to prioritising investigations based on clinical urgency.

Assessor Feedback

The below section is to be filled in by the Assessor

How much supervision did the trainee require during this activity?

4 – I needed to be available to contact just in case (supervision at a distance).

What did the trainee do well? *

Agnes demonstrated strong clinical reasoning and communication skills. She obtained a comprehensive history, performed an appropriate examination, and synthesised findings into a clear provisional diagnosis. Her explanation of the management plan to the patient and carer was clear and empathetic.

What could the trainee improve upon to improve their performance? *

Agnes could improve time management during consultations by summarising findings earlier and prioritising key discussion points. Continued practice in streamlining investigations will enhance efficiency in complex cases.
