Observation Capture Details

Observation Capture Type *

Community and public health engagement

Summary of Activity *

I delivered an oral presentation analysing a recent public health outbreak to a multidisciplinary audience. I outlined the epidemiological context, key risk factors, control measures implemented, and recommendations for ongoing management, using visual aids to support clear communication of complex information. I also facilitated discussion and responded to questions to assess understanding and encourage engagement.

Complexity *

2 - Medium

Primary Learning Goal

9: Communication and engagement for population health gain

Learning Goal Components

Select the learning goal components observed during the Observation Capture.

Name	Observed	
select a suitable context and include community representatives, stakeholders, and other team members	Yes	No
select and use appropriate modalities and communication strategies, including written material and oral presentations	Yes	No
communicate information at a literacy level appropriate for the target audience, ensuring the information and delivery is culturally appropriate	Yes	No
communicate information at an intensity and using a medium that is proportionate to the risk	Yes	No
verify audience understanding of information conveyed	Yes	No
ensure communications / conversations are documented to support decision making, actions, and medicolegal accountabilities.	Yes	No

Trainee Reflection

The below section is to be filled in by the Trainee

What did you do well? *

I delivered a well-structured presentation that was clearly organised and easy to follow. I invested significant time in preparing the slides and sought supervisor feedback to refine the content and delivery. Practising the presentation beforehand increased my confidence and helped me stay within the allocated time. I also arrived early to ensure all technical aspects were functioning smoothly.

What could you improve next time? *

I found responding to audience questions challenging and would like to build greater confidence in thinking on my feet. I plan to work with my supervisor to practise structured responses and develop strategies for handling questions effectively. In future presentations, I will stand rather than remain seated to improve my body language and engagement. I will also focus on maintaining stronger eye contact with the audience.

Assessor Feedback

The below section is to be filled in by the Assessor

How much supervision did the trainee require during this activity?

3 – The trainee was able to act with direct supervision

What did the trainee do well? *

The trainee was well organised and ensured all technical aspects were functioning effectively prior to commencement. The slide content was clear, appropriately concise, and well structured, avoiding excessive text. The trainee communicated clearly and maintained a professional tone throughout the presentation.

What could the trainee improve upon to improve their performance? *

The trainee appeared somewhat rigid and maintained limited eye contact with the audience, which affected overall engagement. With further experience and practice, greater use of natural body language may enhance delivery and audience connection. The trainee would benefit from developing strategies to respond to questions more confidently, including taking time to consider responses before answering. Greater acknowledgement of other team members' contributions during the presentation would also strengthen collaborative professionalism.
